The application has been amended as follows:

To better identify the invention, **the title is replaced with the following:**

"An Electronic Marketplace Communication System".

In addition, regarding new claims 30-39 wherein the software is embodied in a computer-readable medium, although the specification does not explicitly set forth a computer readable medium it is common knowledge to those of ordinary skill in the art that a computer system has some form of storage when executing software and since the specification sets forth the communication exchange executing on at least one computer system both in the original claims and the specification, the medium is an inherent feature and thus is supported under 35 U.S.C. 112 1st paragraph.
